
Two EU Writers Under Threat of Murder: Roberto Saviano and Dr Les Sachs

autore: Dan Hajidahimage1:

Two significant writers in Europe are now under direct threat of murder by criminal mafias, in revenge for their journalism.

One of these authors is Roberto Saviano, the author of a major book on the mafia in Italy, and under

direct threat that he will be murdered, by order of those whose criminal operations Saviano has helped to expose.

The other of these authors is the political refugee from the US in Belgium, Dr Les (Leslie) Sachs, also an anti-corruption journalist and book author. Like Saviano, Sachs has also dared to break some taboos.

Dr Les Sachs has dared to be a pioneer journalist writing about what is perhaps the largest criminal mafia in the world - The mafia of corrupt judges and lawyers in the United States of America, the mafia who are imprisoning hundreds of thousands of innocent people, the mafia who accept bribes to destroy and torture the innocent, the mafia who use the US courts a licence to steal from all the world's citizens.

According to the criteria explained by Roberto Saviano in his recent interview with Euronews-net, it may actually be Dr Les Sachs who is in even graver danger of imminent murder, by the US political figures who want to have Sachs assassinated.

The Euronews interview with Roberto Saviano can be found here:

<http://mytinyurl.net/c0afa6>

In this above interview on "Living with the threat of death", Roberto Saviano speaks of the specific strategy that is used by mafias to kill a brave journalist, and he says:

"Their strategy is simple – they try to destroy the image, the essence, of the person who is attacking them, that is what they have always done. They try to make out that you are lying, that you are crazy, a clown. Recently, that is what they have tried with me. If they can put out that message, that you are nothing, then you are vulnerable." - Roberto Saviano

Saviano explains that it is the "the media spotlight shining on me" which is his margin of safety.

By Saviano's analysis, the life of his fellow journalist Dr Les Sachs in Brussels, is hanging by a thread, and Sachs is much more in danger from the US and CIA government mafia, than Saviano is in danger from the Italian mafia.

An estimated US \$2 million has been spent on the long US campaign to have Dr Les Sachs silenced, banned and murdered. A large portion of this amount of money to attack Sachs, has been spent on what European lawyers describe as the largest global media campaign of libel and lies, that has ever been launched against a political refugee.

The internet is now filled with lies and hoaxes about Sachs by large media companies, helping the CIA and US government.

Moreover, in order to help murder Dr Les Sachs, the US judges have given instructions to Google and other internet search engines, to ban and block Sachs' European websites, and shut down Sachs' sharpest political blog, with articles that were prized by thousands of victims of the US legal system, articles like Sachs' "Americans Murdering Their Judges", which have been called "brilliant".

The US judges and government are now directly instructing the monopoly-dominant Google, to close down and 'erase' the truth about Sachs from the internet, so that much of Sachs' own journalism cannot be found, and most people can only find the lies about Sachs that are being spread by politically-connected US media companies.

Regarding the lies and hoaxes being spread about Dr Les Sachs, European journalists have begun to fight back, and place online some scans of government and police files which expose the falsehoods in these attacks upon Sachs. An online resource regarding the crimes against Dr Les Sachs, and the lies and hoaxes against him, can be found here:

<http://cornwell-trial-documents.skyrock.com/>

Very sadly, and quite significantly, the mighty near-monopoly search engine Google has agreed to co-operate with the US government, to help murder Dr Les Sachs in Belgium. Google has agreed to block and hide Sachs' European websites so he can more easily be killed by US agents, while Google helps to spread lies about Sachs that were planted by US political figures.

A previous article, about Google's role in blocking the websites of Sachs so that he can be murdered, and explaining at length the history of the US mafia attacks on the journalist Sachs, can be found here:

<http://www.indymedia.be/en/node/31259>

Or also here:

<http://mytinyurl.net/f35b4e>

The above article also informs readers as to how to find the European websites of Sachs that are banned and blocked under US orders, and lists some of the journalism of Sachs to which access has been denied or restricted by orders of the US mafia which is now trying to take political control of the European internet.

In addition to Google suppressing the truth, while pushing lies and hoaxes about Dr Les Sachs toward the top of search results, the monopoly-dominant website Wikipedia, has also long joined the efforts to have Sachs murdered.

Wikipedia hates Dr Les Sachs, because of how Sachs did early journalism, that exposed the corruption of Wikipedia in allowing operations by CIA and US intelligence agents, and by political friends of US President Bush. - So Wikipedia has declared a direct war upon Sachs, giving full support to the banning of Sachs' writings and to US figures who are funding efforts to have Sachs killed.

The official UK spokesman for Wikipedia, the British-Australian David Gerard, speaking for Wikipedia's founder Jimmy Wales, has sent hate mail and insults to Dr Les Sachs, and taunted Sachs by telling of his personal efforts to try and suppress Sachs' communications so that Sachs can be killed.

Indeed, for a long time, Wikipedia has allowed staff of US political figures to operate on Wikipedia, spreading whatever lies and insults they wished about Dr Les Sachs, and Wikipedia engaged robotic tools so that Sachs was blocked from eliminating the lies and insults and deceptions.

It seems that unlimited money is offered by the US establishment, to those who will help spread lies about Dr Les Sachs. Given that Sachs is under attack by the mafia of corrupt US judges, even US law professors have joined in the attacks upon Sachs, helping to spread lies and hoaxes about him.

One such law professor is Rosario Roy Girasa, working directly for the publishing company of a major Bush contributor, and also directly linked to a US lawyer, Alexander "Alex the Gangster" Gigante, apparently a member of the New York Gigante mafia crime family, and Gigante himself a leader and originator of the efforts to have Dr Les Sachs banned and murdered.

Professor Girasa wrote a dishonest 'law professor article' which told elaborate lies about how Dr Les Sachs came to suffer the US banning of his journalism and freedom of speech. The lies of Girasa on the internet, then became a major 'source' for the lies on Wikipedia attacking Sachs, and then for many other internet comments attacking Sachs as well.

With Sachs' own websites blocked and banned by Google, the most important journalism of Dr Les Sachs is now very hard to find directly. - Among that central journalism that is banned, is the true story of how Sachs became a refugee, how the US judges and government have threatened to murder him, and the set of criminal acts committed by US agents in Europe, since Sachs took refuge here.

Some of the major US media companies, having printed false and libellous stories about Sachs in the past, now have a direct mutual financial interest with the US government, in seeing that Sachs is

murdered, to cover up for their own past misconduct.

With all the lies about him on the internet, and his own websites blocked, the reputation of Dr Les Sachs is largely smeared and slandered, from the point of view of casual searchers of Google, who do not realise that Google has agreed to help the CIA and US government to spread lies about Sachs and hide the truth about him.

Indeed Sachs has suffered the calamity of malicious large-scale slandering, which his fellow threatened writer Roberto Saviano says is the prelude to mafia murder. As Saviano said in his Euronews interview, as if speaking of Sachs himself: "... They try to make out that you are lying, that you are crazy, a clown. ... If they can put out that message ... then you are vulnerable. ... "

The situation of the US media slandering of this brave US dissident Dr Les Sachs, is so wicked, that people from all around the world have e-mailed Sachs contempt and insults, after reading lies about him that they have found via Google or Wikipedia.

They have tried to do the same thing with Roberto Saviano, but Saviano was lucky in that the Italian mafia did not control the larger European media and publishing companies, which are able to give Saviano "the media spotlight shining on me" which Saviano declares is helping to protect and save his life.

Roberto Saviano's colleague, Dr Les Sachs, is not so lucky, however, given that Sachs' journalism has challenged the most powerful mafia in the world, the mafia of US judges, and the mafia of US media companies who support US legal corruption.

It is the brilliance of Dr Les Sachs' banned journalism, that he has gone into the most taboo topics, the very core machinery, of the whole US programme of global war, torture and attacks upon the innocent.

Despite the fact that Dr Les Sachs' journalism is hailed with great praise in thousands of emotional e-mails from victims of the US legal system, the large US media corporations are themselves forced to submit to the mafia. The US-based corporate media are unwilling to help anyone who exposes corruption among the US judges.

And thus Dr Les Sachs is a man marked for being banned, being slandered, and being assassinated.

European government figures think it possible that Dr Les Sachs may be murdered soon, and they may be helpless and unable to stop his murder - A murder that is more likely to take place by poison or arranged 'accident', rather than an assassin's bullet, which would be considered 'too messy' for a murder in today's Brussels.

The attacks on Dr Les Sachs are largely a legacy of the Bush era, as it was a close George Bush family friend and financier, the right-wing-extremist writer Patricia Cornwell, who has been largely funding the efforts to have Sachs banned and murdered. For US files showing evidence of criminal acts committed by Patricia Cornwell against Sachs, see here:

<http://cornwell-trial-documents.skyrock.com/>

But the attacks on Sachs, initially by George Bush's financier friend and a few lawyers and one racist US judge, have now come to involve most elements of the US government apparatus, including the CIA and intelligence agents, and a large gang of US federal (national) judges, who all want to see Sachs dead, his journalism erased and extinguished, and never to be seen again on the internet once the ashes of Sachs' dead body have been cremated.

At the moment, it is not yet clear whether the new US Obama government, will change the Bush-era policy of seeking to have Dr Les Sachs murdered, and his writings erased and suppressed from the internet.

The new Attorney General of the United States, Eric H. Holder Jr, appointed by President Obama, has received an EU request to prosecute the clearly-proven criminal acts against Sachs. Holder has already received requests from Europe, to begin to put in prison these friends of Bush who acted to have Sachs threatened with murder, to destroy Sachs' life and journalism and to take all of his human rights away.

But Obama's Justice minister Eric Holder, is facing powerful internal US forces, which want to continue to have Dr Les Sachs banned and killed, and his journalism suppressed.

The fact is that Dr Les Sachs had become perhaps the most authoritative online 'underground' journalist regarding the corruption of the US legal system. - In the files for European police, are repeated e-mails from readers, saying how no one else had ever exposed as accurately, the true horrors of America's judicial and legal mafia.

A centrepiece of this journalism that was banned, is Sachs' own fact-based story about how US judges staged a fake 'trial' to ban his freedom of speech, with friends of the US federal judge directly threatening to have Sachs murdered. Sachs suffered instant banning of his freedom of his speech the very first day, and then, with no trial at all, friends of the US federal judge threatened to torture Sachs to death, to 'conclude' the case with a fake 'victory settlement' for Bush's friend.

Sources with the US Department of Justice itself make clear, that the entire proceeding was a proven fraud, with the judges' own friends threatening to torture Sachs to death. And the US court and government documents - some of which are already online, at the site linked above - clearly prove that major crimes against Dr Les Sachs were committed.

And then there was a second fake trial after Sachs took refuge in Europe, held by the same group of US judges who originally threatened to kill Sachs. The purpose of this second fake 'trial' - even though Sachs was already living as an EU citizen in Belgium - was to issue orders to Google to block Sachs' sites from the internet all around the world, and to help spread more lies about Sachs via US-tied media companies, and thus to enable Sachs' final murder and extermination at the hands of the US mafia.

The thousands of e-mails in the Sachs files, document clearly that, from his refuge in Europe, Sachs was in the process of galvanising resistance efforts among the millions of victims of the US legal system, especially in support of the grass-roots "Jail 4 Judges" movement, which has been trying to give common people in America, some tools to fight back against the US mafia of judges and lawyers.

It seems that this is a major reason why the US government as a whole, wants to have Sachs' websites blocked, and Sachs himself killed. - The US powers, at all costs, seem to want to destroy any possible challenge to the US judicial mafia, even if that means slandering and murdering a journalist and EU citizen in Brussels.

Another US-origin journalist, Mark Ames, who has himself lived partly in exile outside the USA, has spoken about how it is classic and typical US savagery, to try to utterly destroy people like Dr Les Sachs, who were on the verge of becoming significant figures of resistance to US oppression. Ames spoke about this in an interview with Jan Frel on AlterNet, which can be found here:

<http://mytinyurl.net/a1d63a>

In this interview, Mark Ames said, apropos of high-potential US resistance figures:

"As for the slave tendency in humanity, I think it's a lot stronger in America than in most other countries in part because no other country on earth has so successfully crushed every internal rebellion. Slaves in the Caribbean for example rebelled a lot more because their oppressors weren't as good at oppressing as Americans were. America has put down every rebellion, brutally, from the Whiskey Rebellion to the Confederate Rebellion to the proletarian rebellions, Black Panthers, white militias... you name it. This creates a powerful slave mentality, a sense that it's pointless to rebel."

Mark Ames seems to have his finger on the motives behind the sheer ferocity and enormous expense of the US efforts to have Dr Les Sachs banned and suppressed, "slandered all over the internet", and murdered.

The US indeed seems hell-bent on having Sachs attacked and killed, not caring about violations of international laws and treaties, and committing a whole series of crimes in Belgium. As a German police source said about another European attacked by the CIA " ... It does not matter to the

Americans that somebody is German or whether sovereignty is violated. They are like rabid dogs." This quote is from an article, "Berlin Protected a German Citizen From CIA", which can be found here:

<http://www.dw-world.de/dw/article/0,2144,1830349,00.html>

Here in Belgium, as of this writing, Dr Les Sachs remains alive, under the quiet patronage and protection of members of the royal house of the King of the Belgians, friendly elements in the Belgian police, the Government of France, and other parties who have been giving quiet support to Sachs.

Also expressing concern for Dr Les Sachs, is the International Federation of Journalists, currently reviewing the courses of action to take, regarding helping to keep this brave journalist alive in the face of the threats to murder him in Brussels.

Though Dr Les Sachs has quiet support among European governments and institutions, extending right into the royal household of the King of the Belgians, the European governments - as is typical regarding the US - still do not want to be too confrontational against the US government, despite the fact that there has actually been a history of US-linked political assassinations and assassination attempts in Belgium.

A list of dozens of "Alleged assassinations in Belgian history" between 1950 and 2005, has been assembled by the 'Institute for the Study of Globalization and Covert Politics', and can be found here:

<http://mytinyurl.net/6ddaf0>

With several dozens of victims, including an 'accident' killing another, while Dr Les Sachs himself has been here in Europe, it may indeed be that this journalist Dr Les Sachs does not have too long to live before he is murdered.

One centre of the Belgian efforts to have Dr Les Sachs banned and murdered, aside from the CIA and other intelligence offices here, is the CIA-linked WilmerHale law firm office in Brussels under Christian Duvernoy. Duvernoy and his partner Joan Lukey in Boston, work for the Bush financier Patricia Cornwell, with a very direct role in the long-term efforts to have Sachs banned and killed. Duvernoy and Lukey do not deny that the murder of Sachs is their goal, and that they are spreading lies around the world and working to block Sachs' websites, so that his murder can be completed.

Among various kinds of criminal acts committed against Dr Les Sachs in Belgium, has been the criminal intimidation of some of Belgium's leading lawyers, who first promised to take legal actions

to help protect Sachs, and then the lawyers themselves were criminally intimidated by the US mafia forces centred around Duvernoy and the CIA-linked WilmerHale law firm.

The names of current lawyers for Dr Les Sachs are not mentioned here, precisely because of the ways in which other Belgian lawyers have been criminally intimidated.

But a question remains as to whether, given the US-led global media smear campaign against Dr Les Sachs, and the blocking of his own websites from the search engines, whether Sachs is now indeed so vulnerable to being murdered - by the criteria that Roberto Saviano has noted - that perhaps Sachs will himself be killed, before the European courts finally force the US government and Google to end this clearly illegal banning and blocking of Sachs' websites.

The truth about Roberto Saviano's case, as a victim of threats of mafia murder, is already well known under a favourable media spotlight. - For Dr Les Sachs, the truth is still only beginning to be known, with Sachs' own websites suppressed from the internet, while a wall of USA media lies and slandering tries to bury Sachs and set up his assassination.

There are many aspects to the long-running attacks on Dr Les Sachs by the US government and by the Bush financier Patricia Cornwell, given the long efforts to destroy Sachs and the approximately US \$2 million spent so far to try to ban him and kill him. But for a general overview of the facts of the case, including original scans of US court files, US Department of Justice files, and European police files, see the following site:

<http://cornwell-trial-documents.skyrock.com/>

And see also the following detailed survey of the attacks upon Dr Les Sachs, the banning and slandering of this important US dissident, and the lies and hoaxes used to attack him.
